Luca Scattolin

3D Technical Artist & Creative Technologist

Padua, Italy scattolinluca2@gmail.com lucascattolin.com linkedin.com/in/lucascattolin github.com/luc4scatto

SUMMARY

3D Technical Artist and Creative Technologist with 6+ years building 3D production pipelines for eyewear brands at Thélios (LVMH) and EssilorLuxottica, from 2D design through rendering, 3D configurators and video. Recent focus: in-house pipeline tools on open standards (USD, OpenPBR in MaterialX), real-time interactive installations (TouchDesigner, Unreal Engine) and self-hosted AI assistants.

SKILLS

3D Software	Blender, Autodesk Maya, Houdini (learning Solaris), Adobe Substance 3D (Painter & Designer), NVIDIA Omniverse, Pixyz
Rendering	V-Ray, Redshift, Omniverse RTX, Unreal Movie Render Graph
Real-Time & Interactive	Unreal Engine, TouchDesigner, MediaPipe, OSC
Code & Automation	Python, PySide/PyQt, USD, MaterialX, OpenPBR, SQL, REST APIs
AI	Agentic workflows (Claude Code, Hermes Agent, OpenClaw, n8n), self-hosted assistants, local models, Obsidian second brain
Self-Hosting	Proxmox, LXC, Docker, Tailscale, Grafana, Prometheus
Motion & Video	After Effects, DaVinci Resolve, Premiere Pro
2D & Design	Photoshop, Illustrator
Audio	Ableton Live, Traktor, Rekordbox
Office	Word, Excel, PowerPoint, Outlook, Teams

EXPERIENCE

3D R&D - 3D Pipeline Developer · Thélios (LVMH) 2023 - Present

- Contributed to developing and maintaining an end-to-end 3D pipeline, from 2D design through rendering, and helped build 3D configurators and promotional video for Thélios and partner Maisons.
- Helped adopt a USD-based 3D pipeline that cut concept-to-market lead time by roughly a quarter, bringing digital content availability forward by up to ~2 months.
- Paired the USD pipeline with on-demand rendering to cut digital content production turnaround by roughly a quarter across brands, speeding up commercial ranking and freeing up capacity for more in-house content and R&D instead of external vendors.
- Cut last-minute design and color changes by roughly a third by introducing more effective upfront 3D approval processes.
- Reduced, and in many cases eliminated, material-to-component mapping errors by moving approvals into 3D earlier in the process.
- Replaced manual Illustrator/Excel upload steps with automation, cutting related production time by more than 50%.
- Shifted Maisons toward 3D digital selling content over physical prototypes (previously single, non-full-SKU samples), cutting physical sample production by roughly half and improving pre-order and reorder rates.
- Automated pipeline steps with Python and agentic AI tooling, including material assignment/creation across 1,000+ SKUs a year, to cut manual production work.

3D Render Specialist · EssilorLuxottica 2019 - 2023

- Produced 3D renders for Prada Group, Burberry and Oliver Peoples eyewear lines over 4+ years.
- Moved into pipeline engineering in the final two years, building and improving internal 3D production tools later carried forward into the Thélios role.

Motion Graphic Designer · HEADS Group 2017

- Motion graphics, video editing and illustration work.

SELECTED PROJECTS

Vivatech Interactive Experience · Thélios (LVMH) lucascattolin.com/vivatech.html

Co-developed a real-time installation for the LVMH Dream Gallery at Vivatech Paris 2026: a live 3D showcase of eyewear digital twins for visitors and press, driven by hand gestures with nothing to touch. Webcam tracking (MediaPipe) in TouchDesigner drives Unreal Engine 5.7 over OSC.

Pipeline Tools · Thélios (LVMH) lucascattolin.com/pipeline-projects.html

Five in-house tools, each removing one slow manual step: a look-dev panel for Omniverse (USD, OpenPBR in MaterialX), a Maya prep toolkit, render automation for Unreal Engine, and catalogue and review deck generators for PowerPoint.

Company Brain lucascattolin.com/company-brain.html

Self-hosted AI assistant that answers product questions in plain language from live company data, with photos, drawings and charts; read-only, and nothing leaves the company. 10-week pilot with a team of 7: 318 answers and 566 queries to company systems, with 82% of answers calling at least one tool.

Homelab · Personal lucascattolin.com/homelab.html

Two-node Proxmox cluster and a UniFi NAS in a 3D-printed rack, running 20+ self-hosted services in LXC containers, with nightly backups, single sign-on with passkeys, Grafana metrics and remote access over Tailscale.

EDUCATION

Master in 3D Graphics - BigRock, Computer Graphic School 2018 - 2019

Bachelor's Degree, Sciences and Multimedia Technologies - University of Udine · 110/110 cum laude 2015 - 2018

LANGUAGES

Italian	Native
English	C1
Spanish	B1

INTERESTS

Technology, self-hosting, DJing & vinyl collection, cinema, Lego.
